Editorial

Eric F. Dubow,
North American *Bulletin* Editor

Welcome to the June 2011 edition of the *ISRA Bulletin*. In this edition, we present preliminary information about our XXth World Meeting in Luxembourg in July 2012. Many thanks to André Melzer and Georges Steffgen (both at the University of Luxembourg) for

organizing the meeting. The Organizing Committee and Scientific Program Committee are beginning to plan an exciting set of invited talks, symposia, and poster sessions. In addition, there will be a number of social opportunities to meet old (and young) friends and colleagues, and to maintain and begin new productive collaborations.

But first, we lead this *Bulletin* with messages from our President, Craig Anderson; our President-Elect, John Knutson; and our Executive Secretary, Mike Potegal. Craig discusses plans developed at our mid-year officers' meeting as well as his insightful perspectives on ISRA's connection to public policy. John, as President-Elect, describes details and our timeline for two very important tasks for which he is responsible: soliciting nominations for ISRA officers and council members and overseeing the development of the scientific program for the Luxembourg conference. Mike reports on our Young Investigators Program that he is chairing, and he discusses a few of his recent and current writing projects on aggression and anger.

Next, you will find preliminary information about the XXth World Meeting in Luxembourg in July 2012.

Then, you will find some "Important ISRA Notices." Here, we announce: 1) a call for nominations for the ISRA officer election for two positions (President-Elect and Treasurer) as well as 5 Council Members; 2) a call for proposals to organize upcoming ISRA World Meetings in 2014 and 2016; 3) a reminder to send information for the website to Yvon Delville; and 4) a link to a copy of the ISRA Constitution and By-Laws.

Next, I included announcements about upcoming conferences and journal paper calls that may be of interest to our members.

A regular feature of our *Bulletin* is our "Books by ISRA Members," which is included in the next section. Several members have co-edited texts: Daniel Antonius and Martin Ramirez; Jackie White; and Mike Potegal.

Then, I have included the titles of paper symposia on aggression from the 2011 Biennial Meeting of the Society for Research in Child Development that I attended in Montreal. The papers included a nice mix of research on biological, cultural, gender, and developmental issues in child and adolescent aggression.

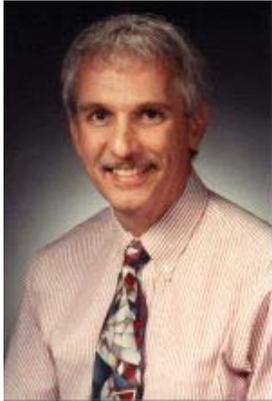

Finally, I have included our ISRA Flyer designed to describe our society, increase our exposure, and attract new members; be sure to share this flyer with your colleagues and students.

In closing, I want to remind everyone that our goal for the *Bulletins* is to keep our members informed of scholarship in the area of aggression and to share each other's work. By now, you know that Ingrid Möller (University of Potsdam) is our new European Editor; Ingrid produced the December 2010 *Bulletin*. So, please email me (edubow@bgsu.edu) or Ingrid (Ingrid.Moeller@uni-potsdam.de) any materials you would like us to include in future *Bulletins*

I wish you a happy and productive Summer 2011!

Eric

A Message from Our President, Craig Anderson

Hello fellow aggressionistas!

ISRA Officers' Meeting

I just got back from the ISRA mid-year officers' meeting in Minneapolis, hosted by Executive Secretary Michael Potegal. Also present were President-elect John Knutson, Treasurer and *ISRA Bulletin* North American Editor Eric Dubow, Archivist Roger Johnson, and Past President Deborah Richardson. André Melzer, co-organizer of the 2012 World Meeting in Luxembourg also joined our merry group in Minneapolis. As you can see in the photo to the right, we saved on accommodation costs by staying in Mike's daughter's Princess Tower. ISRA founding member and long-time *Aggressive Behavior* editor Ron Baenninger and his wife MaryAnn joined us for dinner at Mike's place.

There are two main functions of this meeting between our biennial World Meetings. One is to be sure that the operations and operational changes for the Society that were instituted at the most recent World Meeting are moving ahead. The other is to work with the organizers of the upcoming World Meeting, providing guidance and assistance, getting the program committee organized, and in general preparing for that meeting. We met for two days at a hotel

at the Minneapolis airport, and got a lot of work done in a very short time.

Some of the fruits of this meeting are apparent in other articles in this issue of the *Bulletin*. Rather than repeating what is in the other articles, I will mention some of the highlights. First, ISRA is in good shape financially. This is a difficult task for a relatively small organization such as ours, especially during economic downturns. Kudos to previous leaders of ISRA for their insight and hard work in this domain. The two main elements of this success are the success of our journal, *Aggressive Behavior*, and the fiscal restraint shown in our use of funds.

Second, planning for the 2012 meeting in Luxembourg is going extremely well. André Melzer and Georges Steffgen are making excellent progress. I have severed in various roles in organizing a number of academic meetings. I must say that our Luxembourg colleagues are better organized and prepared than I ever have been. Also, I visited Luxembourg a couple of years ago, and can tell

you this is a wonderful venue for our meeting. It is a beautiful city with lots of fascinating things to see and do. And the University is a great place for our meeting.

Third, we affirmed the judgment made in Storrs (and in prior meetings) that bringing young talent into ISRA and getting our younger colleagues involved in the Society is very important to the future health of ISRA. To this end, we will be continuing the Young Investigator Program, and are trying to keep previous Young Investigators (YIPees?) active in ISRA.

Fourth, we affirmed that we need to continue to seek to broaden our membership, both geographically and academically. Many of us older members can recall when our membership included more biologically oriented scholars, more animal researchers, and more aggression scholars from fields such as political science, sociology, and economics.

This leads me to a request to all current members. Please look around your own university, your own scholarly "back yard," for people whose research interests intersect with aggression in an important way. Encourage them to join ISRA, to put together symposia for our World Meeting, to submit papers to *Aggressive Behavior*. With all of the current armed conflicts and acts of terrorism, and with all of the funds and studies being devoted to understanding issues of aggression and violence, the world has seen a great increase in scholars from a wide range of disciplines focusing their considerable talents on issues of interest to ISRA. And don't forget about your own graduate students. Student memberships are extremely inexpensive and very valuable.

ISRA and Policy Issues

I'd also like to share a few thoughts with you about the role of scientific research and the scholars who do such research, and public

policy. It is a bit ironic that I have been dragged into this domain, an irony not lost on my friend and University of Missouri colleague (during my 11 years there) Russ Geen, or on my friend and former graduate school office mate David Funder. Both have commented in recent years that I was the last person they ever thought would be involved in public policy issues. But as we social psychologists like to point out (ad nauseum, some would say), variables in the social environment sometimes are so powerful that they override individual differences in traits, preferences, and attitudes.

In my case, I've been repeatedly drawn into public policy debates concerning media violence effects, most recently the debate about the effects of violent video games on aggression and other aggression-related variables. The forces that led into this quagmire are of two types. First, I agree with the numerous leaders of APA and other professional and academic health organizations that scientists have an obligation to give away our knowledge to the general public. At a minimum, this means being willing to talk at least occasionally to news reporters about research within one's area of expertise, and being willing to consult (usually for free) with various health, government, and public policy groups, again within one's area of scientific expertise. It does not necessarily mean seeking out such opportunities to educate various groups (including the general public), but to at least be willing to share your expertise when asked. As you might guess, I get asked a lot (several hundred times a year). You might not know that I usually decline, primarily because of time constraints. We all have to pick and choose our battles, so to speak.

Second, there are several hugely powerful groups who continue to mislead the general public, parents, parent groups, and public policy makers about the research on media violence effects. A number of years ago, at the 1996 APS convention in San Francisco I believe, I chaired a symposium on media violence that included

long-time ISRA member Len Eron as a speaker. In my introductory comments for the symposium I noted that the time had come to stop debating about whether media violence exposure could increase aggressive tendencies, because the evidence was so overwhelmingly clear. I urged scholars in the field to instead focus more on the underlying mechanisms that led to such effects, in the hope that we eventually could find ways to reduce the harmful aspects of media violence. And this was the focus of the symposium. I'll never forget what happened after the symposium was over. Len came up to me and said that he truly appreciated my opening remarks because he had been waiting for years to hear someone outside of his research group to say those words, that the debate over whether there are harmful effects should be over, so that all can move on to the next stage of research. Of course, although I was correct in that the debate among true media violence experts was over, I was completely wrong to think that public debate would soon be over, as soon as a few leading scholars pointed out the soundness of the research (as has since been done repeatedly, not only by the media violence scholars themselves but by numerous scientific review panels).

In short, I continue to do the occasional interview with news reporters around the world on this issue, and continue to consult with various parent groups, child advocacy groups, and government groups. I do so because I feel obligated to give away the scientific knowledge accrued over the last 60 years by hundreds of scholars from around the world, and because the media industries and their apologists continue to distort and outright mislead the world about the harmful effects of many of their most profitable products. Indeed, their campaigns to discredit and isolate leading scholars and to promote pseudo-scientific contradictory research is essentially the same as those used by the tobacco industry and the lead industry, among others.

So, how does this relate to ISRA? Well, in the June 2010 issue of the *Bulletin* there was a nice article by Roger Johnson on this very topic, focused specifically on a recent California law that would require parental permission for youngsters to purchase certain types of violent video games. That was followed by a very thoughtful letter from Rowell Huesmann, a former ISRA president and the leading media violence researcher in the world (in my humble opinion). That law has ended up in the U.S. Supreme Court, and is being watched very carefully by groups worldwide. In fact, by the time this goes to print the decision will likely have been announced.

Roger took the important steps of working with the legal team representing California Senator Yee (who is the primary author of the law) and of getting aggression researchers (mainly ISRA members) involved. As many of you know, a small group of us drafted a statement that focused solely on the scientific research. Roger distributed that statement to a large number of aggression scholars (especially ISRA members), asking them to sign it. That statement became an appendix to the amicus brief filed by State Senator Yee. You can download a copy of the entire brief (including the appended statement) from my home page: www.CraigAnderson.org.

It is important to note that this statement neither endorsed the California law, nor argued against it. This is important to me and many others who drafted and signed the statement because we believe that our role as scientific experts does not include making legal or public policy judgments. In fact, several of the signers of the statement personally do not support the California law, and hope that the Supreme Court overturns it.

The ISRA Constitution and By-laws (see the last issue for the current version) allow the Society to comment on such issues, but has a specific procedure. Here is the relevant section.

Statements on public policy concerning problems of aggression shall be handled by the Society in the following manner: The President, with the advice and approval of the Council, shall appoint a special Commission to review the specific problem. After suitable study, the Commission may issue a public statement. The Commission shall bear sole responsibility for any statement issued.

Although the procedure is fairly specific, the domains to which it applies are somewhat vague. Should we endorse political or public policy statements that seem reasonable but that are not entirely based on solid empirical and theoretical research? Or should we generate reports or statements that are limited in scope to what the science has clearly demonstrated? Or should we avoid any statements that might annoy any group, outside or within ISRA? Based on conversations with current ISRA officers as well as several past ISRA leaders, I have chosen to adopt the middle ground. That is, I would be quite willing to appoint an expert Commission on any aggression topic with goal of creating a statement that focuses on what the scientific research says. I believe that ISRA should be more active in educating the general public on topics for which we have sufficient expertise. I believe that such Commission-based statements would benefit ISRA and society at large.

If you have such a topic that you would like ISRA to address, please let me know. Please keep in mind that the time involved in following our By-laws means that issues that demand a short turn-around time simply cannot be done. That is why ISRA could not do so in time for the specific U.S. Supreme Court case described earlier. And that is why the statement appended to the Gruel-Yee amicus was not an ISRA statement. However, we could appoint a Commission to issue a report on the state of the science on media violence effects, or on other

aggression-related topics for which ISRA has sufficient scientific expertise.

By the way, for those of you who are interested in the current U.S. Supreme Court case, note that the video game industry funded and filed an additional amicus brief written and signed by a group claiming to be experts in the area, and who essentially claimed that there is no evidence of harm. ISRA Fellow Brad Bushman and I were contacted by a law professor who was interested in the case, and we recently published a paper on the relevant expertise of the two sides. You can download a copy of that article by clicking on the following link: <http://www.psychology.iastate.edu/faculty/caa/abstracts/2010-2014/11SBA.pdf>

Also, you can download a somewhat more detailed account of our methods and results here:

<http://www.psychology.iastate.edu/faculty/caa/abstracts/2010-2014/11BA.pdf>

Finally, I again urge you to help recruit members for ISRA, to consider putting together a symposium, a talk, or a poster for the 2012 meeting, and to plan on attending the meeting in Luxembourg.

Regards,

Craig

**A Message from Our
President-Elect,
John Knutson**

Preparing for ISRA 2012: Scientific Program and Elections

I would like to focus my comments to the membership on the two critical matters in which the President-Elect has primary responsibilities: chairing the Nominations Committee and chairing or co-chairing the Scientific Program Committee for the next Biennial World Meeting. The former responsibility is established in our Constitution and By-Laws and the latter responsibility has become a tradition established by the actions of recent Presidents of the Society.

First to the matter of the 2012 elections. In the spring of 2012 we will be electing a Treasurer, a President-Elect, and new members of Council. I would like to remind the membership that there are two mechanisms within ISRA to develop a slate of candidates for these positions. The first is by the Nominating Committee that I will be appointing soon. The second is by direct nominations from the membership. That is, five active ISRA Fellows can nominate candidates for the open officer positions, as well as for Council. To be sure that we develop a slate of candidates in a timely fashion so that the election can be completed well before the

Constitutionally-established deadline of June 1, 2012, the recent off-year meeting of the officers concluded that nominations from the membership should be submitted to me by November 1. Thus, if you would like to engage in the process of direct nomination, you need to join with 4 other ISRA members to submit the name of a candidate to me. Any active (i.e. dues-paying) ISRA Fellow is eligible for nomination. Associates and student members are not eligible for nomination.

Now to the matter of the 2012 Biennial World Meeting in Luxembourg July 17-21, 2012. At the off-year meeting of ISRA Officers held earlier in June in Minneapolis we were joined by André Melzer, one of the two local organizers of the meeting. Based on our discussions and Professor Melzer's presentations, Luxembourg promises to be an excellent venue for the ISRA World Meeting. More importantly, it was clear to the officers that the local team has done an outstanding job getting everything in place that will facilitate the effective exchange of information among scholars and the sort of participatory engagement that we have come to expect from ISRA meetings. All of the officers were impressed by the organizers' attention to detail and how far along they were in the planning process. In short, the structure is in place for a great meeting.

The next critical step in having a truly memorable meeting is the development of a strong scientific program. Although the Program Committee plays a role in the development of a strong meeting, it is essential that members actively participate and present their research. Importantly, much of our discussion at the Officers' Meeting focused on how to ensure the meeting is consistent with the ISRA goals of interdisciplinary exchanges. Several members have observed that there are many areas of aggression research that have not been well-represented at ISRA World Meetings and it would enhance the experience of all members in

attendance if greater breadth of discipline were on the program. Although invitations of plenary speakers can contribute to broadening the scope of the scholarship represented on a program, the officers felt that plenary speakers alone are not sufficient to truly yield an interdisciplinary meeting. Thus, we explored a number of options that might be used to increase the interdisciplinary nature of the next World Meeting. From those discussions, two concrete suggestions emerged that directly involve the membership of the Society.

First, it was suggested that members identify colleagues and scholars who are doing aggression research from *outside* their own discipline and to approach those researchers and encourage them to submit symposia to the meeting. That is, it was thought that members might be in an excellent position to identify active scholars who might be doing research on aggression using methodologies and subject samples (e.g. nonhuman primates, neuroscience, neuroimaging, genetics, political science, criminology) or pursuing topics (e.g. religion and war, torture) that are less represented at ISRA meetings. Thus, I would like to encourage the membership to think broadly about the area of aggression research, to try to identify scholars who would contribute to the scholarly breadth

of ISRA, and to encourage those scholars to develop a symposium for submission to the Scientific Program Committee (February 1, 2012 deadline).

The second suggestion was to encourage members who are intending to organize a symposium for the meeting to try to make those symposia interdisciplinary. In this context, we recognize that some of the scholars from outside your own area might not be readily persuaded to develop a whole symposium, but they might be willing to join you in a symposium on a topic of mutual interest. Thus, as you formulate a plan for your own symposium, I would like to encourage you to make that symposium as interdisciplinary as possible.

I am really looking forward to the next Biennial World Meeting. I hope you will be joining me, your friends, and your colleagues in Luxembourg, and I hope you will accept my charge to increase the interdisciplinary nature of the meeting as well.

Best wishes,

John

A Message from Our Executive Secretary, Mike Potegal

Greetings!

I am very happy to accept the Chairmanship of the 2012 Young Investigators Program. The 2010 Program in Storrs was a great success

and, like the first, 2008 Program in Budapest, has encouraged bright young people to pursue careers in aggression research by paying their way to present their work at our Biennial meeting. The pre-meeting YI workshop we added in 2010 was also a hit. And, YIs have come back to our meeting. I think the YI program is among the best things ISRA has done for itself and for the field(s) of aggression research. We will be sending out a call for YI applications in the fall, and will ask ISRA members to pass the news along.

If you are interested in catching up on recent research on anger, I recommend “The International Handbook of Anger” (Springer 2010), which I co-edited with Gerhard Stemmler & Charles Spielberger. (See the review in the “Books by ISRA Members” section of this *Bulletin*.) Thirty-two chapters by internationally known authors are grouped into 8 sections: Biology of anger, Cross cultural expressions and experience of anger, Anger in child development, Appraisal and information processing in anger, Lifespan changes and gender differences in anger, Time course of anger: State, trait and the persistence of vengefulness, Clinical Aspects of Anger, and Conflict and anger in family, workplace, and community. The book has received at least one nice review (Dunn, D. A Contemporary Tour of a Familiar Emotion:

Anger PsychCritiques Contemporary Psychology: APA Review of Books
http://psqtest.typepad.com/blogPostPDFs/20100925_psq_55-39_AContemporaryTourOfAFamiliarEmotionOnAnger.pdf

One of my next writing projects is an advanced undergrad-grad student level textbook on aggression that I will be working on during a fall 2011 sabbatical. The book will cover an extensive range of thought and experimental traditions in aggression research. Information on relevant biological, behavioral, and social phenomena and processes will be drawn from individual and group level domains of research in anthropology, behavior genetics, criminology, economics, ethology, experimental psychology, game theory, neuroscience, psychiatry, psychophysiology, social psychology, and sociology. The many parallels between human aggression and that of other animals will be described as will the major differences that arise at the level of organized aggression. I will be asking ISRA members for advice and help in critiquing individual chapters.

Best wishes,

Mike

— **Preliminary Information** —
XXth ISRA World Meeting
at the
University of Luxembourg
July 17 to 21, 2012

Meeting Dates

The **XXth ISRA World Meeting** will be held at **Campus Walferdange** of the University of Luxembourg in July 17 to 21, 2012.

Meeting Venue

Campus Walferdange has a large lecture hall (Audimax) and several conference rooms. The venue is close to Luxembourg City (10 min by car). A **train station** is right next to the Campus (8-min ride, 2 stops from/to Lux City). Luxembourg's Findel International Airport (15 min by car) has scheduled flights to numerous European cities.

Luxembourg City offers hotels of different price categories. There will be a **shuttle bus service** (free of charge) from/to Luxembourg main station for all conference attendees (4 times per day).

Scientific Program

The scientific program of the World Meeting will reflect the dynamics and great diversity of current worldwide research on aggression. An extensive list of topics is currently under development. Suggestions should be sent to local organizers:

André Melzer ([André.melzer@uni.lu](mailto:Andre.melzer@uni.lu))
Georges Steffgen (georges.steffgen@uni.lu)

There will be oral paper presentations, poster sessions, four invited talks, a public lecture, a pre-conference workshop for young investigators from all around the world, a meeting of members, and a special meeting for investigators outside ISRA.

Call for Abstracts and Symposia

- **February 1, 2012:** submission of **symposia** due
- **March 1, 2012:** submission of **abstracts** due
- Submission information will be presented in the December 2011 *Bulletin*, which will be posted on the ISRA website, and will be sent to members by email.

Social Program

“Non-scientific” activities will be an integral part of the Meeting and will be included in the registration fee. These activities comprise a **welcome reception** (Tuesday, July 17), a **guided city tour** (Wednesday, July 18), the **gala banquet** (Friday, July 20), and a **farewell reception** (Saturday, July 21). Also included in the registration fee are **lunch buffets** that will be provided during the conference.

Registration Dates

- **Early** registration begins **March 1, 2012** (*reduced fees*)
- **Late** registration begins **June 16, 2012** (*additional fees*)
- **ISRA World Meeting: July 17 to 21, 2012**

Registration Fees Per Person in EUR (€)

Type	Early	Late	On-Site
Member	180 €	225 €	275 €
Non-Member	230 €	275 €	425 €
Student	100 €	125 €	150 €

(continues on next page.....)

Pre- or Post Meeting Tourism

Luxembourg is located in the very heart of Europe. You may consider, for example, day trips to **Paris** (France, 2 hrs by train), **Brussels** (Belgium, 3 hrs), or **Trier** (Germany, 1 hr). Assistance in booking will be provided if wanted day trips are not included in the registration fee).

Local Hosts

André Melzer (André.melzer@uni.lu)

Georges Steffgen (georges.steffgen@uni.lu)

University of Luxembourg, Research Unit
INSIDE, Campus Walferdange, Route de
Diekirch, B.P. 2,
L-7201 Walferdange, Grand-Duchy of
Luxembourg

Further Information

See the December 2011 *Bulletin* and the
web site of the XXth ISRA World Meeting:
<http://isra.uni.lu> (available from August 1,
2011).

Important ISRA Notices

ISRA ELECTION: CALL FOR NOMINATIONS

The following offices are up for election in the Spring of 2012:

President-Elect
Treasurer

In addition, we will elect 5 new Council members, each for a 4-year term.

The Nominations Committee, headed by President-Elect, John Knutson, is currently putting together a slate of nominees.

According to our Constitution, any group of five members may submit an additional nominee for any office or Council member position currently up for election. If you would like to submit a nominee, please do the following:

1. Check to be sure that your nominee is willing to serve.
2. Send the nominee's name, the office for which the person is being nominated, AND a list of five ISRA members who support the nomination to John Knutson (john-knutson@uiowa.edu) by November 1, 2011.

The current officers and Council members are listed at:
<http://www.israsociety.com/officers.html>

PROPOSALS FOR FUTURE WORLD MEETINGS

Even as we prepare for the 2012 ISRA Luxembourg World Meeting, we need to

plan the location of our future meetings. The 2014 conference will be held in a Western Hemisphere city, and the 2016 meeting will be held in an Eastern Hemisphere city. **If you are interested in being a conference organizer, please contact Executive Secretary, Mike Potegal (poteg001@umn.edu) ASAP.** You will also need to prepare a full proposal to host the conference. Guidelines for preparing the proposal can be found at:
<http://www.psychology.iastate.edu/faculty/caa/csv/isra/Conferenceguidelines-2009Revised.pdf>

Your full proposal for the 2014 conference will be due on December 1, 2011.

ISRA WEBMASTER

Our ISRA webmaster is Yvon Delville, Dept. of Psychology, The University of Texas, Austin, TX 78712.

Please contact Yvon at Delville@psy.utexas.edu if there is information you would like to see on the website.

The website is: www.ISRASociety.com

ISRA CONSTITUTION AND BY-LAWS

The ISRA Constitution and By-laws can be found at:
<http://www.psychology.iastate.edu/faculty/caa/csv/isra/Constitutionandbylaws-Amended2010.pdf>

Conference Announcements and Call for Papers

5th Annual CICA-STR International Conference on Contemporary Issues on Violence, Aggression and Terrorism: A Local to Global Perspective.

The University of California, Irvine
(USA), September 7 - 9, 2011

Organized by CICA (Coloquios
Internacionales sobre Cerebros y
Agresion), STR (Society for Terrorism
Research), and DTIPS (Diversity
Training Institute for Public Safety)

Those interested please contact **Stephen
Thom** for more information:

Stephen.thom@diversitytips.org with
Cc to: <mramirez@med.ucm.es> and
<tkwstr@gmail.com>

33th CICA on the occasion of the XXV Anniversary of the Seville Statement on Violence

CNR (Italian National Research Council),
Rome (Italy), 22-25 September 2011

Organized by CICA (Coloquios
Internacionales sobre Cerebros y Agresion)
and CNR (Istituto di Scienze e Tecnologie
della Cognizione)

Registration will include some meals and all
program sessions including conference
materials.

Those interested please contact Dr.
Camilla Pagani, CNR, for more
information:
camilla.pagani@istc.cnr.it with Cc

CALL FOR PAPERS

*Journal of Aggression, Conflict and Peace
Research* (JACPR) publishes a broad range
of practical studies, empirical academic
articles and review papers on all aspects of
aggression, conflict and peace. It is a high-
quality source of both academic and practice
development with a clear remit of translating
research findings and policy into
implementations for practice.

The Journal is published quarterly in
association with the University of Central
Lancashire, Ashworth Research Centre and
the International Family Aggression Society.

Papers on the following topics are
welcomed: individual and mass aggression,
bullying, family violence, sex offending,
resolution and terrorism.

Papers for consideration should be
submitted via email to the Editors-in-Chief
with 'JACPR' noted in the subject line.

Books by ISRA Members

1) **Interdisciplinary Analyses of Terrorism and Political Aggression** (2010)

Editors: Daniel Antonius, Adam D. Brown, Tali K. Walters, J. Martin Ramirez and Samuel Justin Sinclair

Date of Publication: Jan 2010

ISBN13: 978-1-4438-1640-3

ISBN: 1-4438-1640-X

Price UK GBP: 44.99

Price US USD: 67.99

(Visit the Cambridge Scholars Publishing Website: <http://www.c-s-p.org/Flyers/Interdisciplinary-Analyses-of-Terrorism-and-Political-Aggression1-4438-1640-X.htm>; the following excerpt was copied from that website)

Over the past decade, academics spanning the professional spectrum have begun to unpack the complexity of factors that underlie terrorism and political violence with increased vigor. The resulting field has begun to yield valuable empirical and theoretical insights into these dynamics, which are now shaping both immediate frameworks for responding to terrorism as well as the broader policy implications for managing this problem in the near and far-term.

Interdisciplinary Analyses of Terrorism and Political Aggression seeks to advance the understanding of terrorism and political violence by disseminating research representing a wide array of professional disciplines from scholars across the globe. This volume aims to encourage academic discourse and debate, and provide a more complex understanding of the myriad of factors that contribute to terrorism as well as the way in which groups respond to terrorism.

Interdisciplinary Analyses of Terrorism and Political Aggression brings together prominent scholars from the US, the UK, Iran, Australia, Canada, Scotland, Poland, Bulgaria, Italy and Spain, representing a variety of academic disciplines including criminology, psychology, psychiatry, police science, physics, sociology, biology and international relations. The authors approach the topic of terrorism from various perspectives, and provide the reader with a more nuanced view on issues of terrorism and political violence.

Daniel Antonius, PhD, is Assistant Professor at New York University School of Medicine, Coordinator for Forensic Sciences and Aggression Research at the Institute for Social and Psychiatric Initiatives (InSPIRES), Co-Editor-in-Chief of Behavioral Sciences of Terrorism and Political Aggression, and Governing Board member of the Society for Terrorism Research.

Adam D. Brown, PhD, is a Fellow at Weill Medical College of Cornell University, Guest Faculty at Sarah Lawrence College, Governing Board member of the Society for Terrorism Research, and Associate Editor of Behavioral Sciences of Terrorism and Political Aggression.

J. Martin Ramirez, MD, PhD, is the Chairman of Coloquios Internacionales sobre Cerebro y Agresión, Chair of the Spanish Pugwash Movement, a former officer of the International Society for Research on Aggression, and a former International Security Fellow at Harvard University.

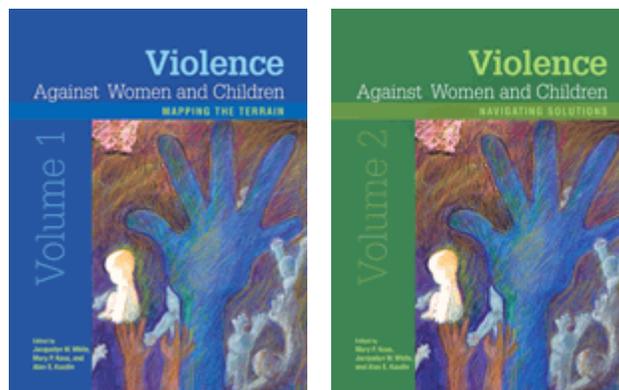

Tali K. Walters, PhD, is Assistant Professor at the Tufts Medical School, a senior forensic psychologist in public and private practice, Vice President of the Society for Terrorism Research, and Associate Editor of Behavioral Sciences of Terrorism and Political Aggression.

Samuel Justin Sinclair, PhD, is on faculty at the Massachusetts General Hospital and Harvard Medical School, Co-Founder and President of the Society for Terrorism Research, Founder and Co-Editor-in-Chief of Behavioral Sciences of Terrorism and Political Aggression, and the developer of the Terrorism Catastrophizing Scale.

2) Violence Against Women and Children (2010)

Volume 1: Mapping the Terrain | Edited by Jacquelyn W. White, Mary P. Koss, and Alan E. Kazdin | ISBN 978-1-4338-0912-5 | Item # 4316122

Volume 2: Navigating Solutions | Edited by Mary P. Koss, Jacquelyn W. White, and Alan E. Kazdin | ISBN 978-1-4338-0914-9 | Item # 4316123

Volume 1: 296 pages. **Volume 2:** 312 pages. Hardcover. **List: \$69.95 each** APA Member/Affiliate: **\$49.95 each**

Child abuse, sexual and domestic violence are among the most destructive experiences afflicting women and children. The prevalence of such violence takes an enormous toll on the lives of individual victims as well as the larger society, through innumerable behavioral, health, psychological, and economic consequences.

While many groups, organizations, and government agencies have been established to identify, prevent, and treat such violence, responses to these problems has been piecemeal and not optimally successful. A coordinated, cross-disciplinary synthesis of what is known, how it is known, and the necessary next steps is sorely needed to enable the field to effectively address these issues.

Developed as part of an initiative by former APA President Alan Kazdin, this two-volume set aims to provide consensus recommendations for researchers, practitioners, advocates, policymakers, and all those who seek more effective responses to interpersonal violence.

In **Volume 1**, experts from diverse disciplines describe prevalence rates among various populations; risk factors for perpetration and vulnerability and protective factors for potential victims. They also document the impact of violence on the victims in terms of psychological, reproductive, maternal and child health, and behavioral and economic consequences. In the process, they establish commonalities across child abuse, sexual and domestic violence, and suggest vital next steps for collaborative efforts.

In **Volume 2**, eminent scholars use a public health model to examine current societal responses to interpersonal violence. Authors examine the efficacy of medical and psychological treatments for victims, families, and perpetrators, as well as justice system responses to various forms of child abuse, sexual violence, and domestic violence. Interventions are suggested at several levels of prevention, including initiatives designed to eradicate the problem (primary prevention), reduce it among those at risk (secondary prevention), and minimize the negative consequences of violence and stabilize health (tertiary prevention). Finally, the editors present an integrative conclusion that provides a sound foundation for future responses across practice, research, advocacy and policy, at the local and national level.

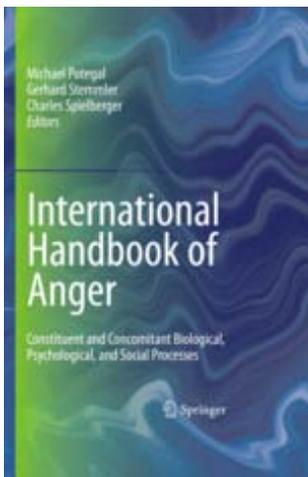

About the Editors

Jacquelyn W. White, PhD, is a professor of psychology and associate dean for research in the College of Arts and Sciences at the University of North Carolina at Greensboro. For almost four decades she has conducted research on gender issues, aggression, and intimate partner violence. She has conducted one of the few longitudinal studies of sexual and physical dating violence among adolescents and college students, a five-year project funded by NIMH and NIJ, and is co-investigator on a NIDA-funded project on substance abuse and trauma. She is co-chair of the National partnership to End Interpersonal Violence.

Mary P. Koss, PhD, is a Regents' professor in the Mel and Enid Zuckerman Arizona College of Public Health at the University of Arizona, Tucson. She has served on the National Academy of Sciences Panel on Violence Against Women and served on the Coordinating Committee of the Sexual Violence Research Initiative established by the World Health Organization and currently based in Johannesburg, South Africa. She is a member of the Multi-Disciplinary Partnership for Strengthening Child-Care & Youth Development, the Arizona Center for Research and Outreach (AZ REACH), a project funded by the United States Department of Agriculture and the United States Department of Defense. She consults nationally with the Gallup Organization.

Alan E. Kazdin, PhD, is the John M. Musser Professor of Psychology and Child Psychiatry at Yale University, New Haven, Connecticut, and Director of the Yale Parenting Center and Child Conduct Clinic, an outpatient treatment service for children and families. Before coming to Yale, he was on the faculty of The Pennsylvania State University, State College, and the University of Pittsburgh School of Medicine, Pittsburgh, Pennsylvania. In 2008, Kazdin was President of the American Psychological Association. His Presidential Initiative on Violence Against Women and Children served as the impetus for these volumes.

- 3) **International Handbook of Anger: Biological, Psychological, and Social Processes.** Potegal, Michael; Stemmler, Gerhard; Spielberger, Charles. Springer, 2010.
ISBN-10: 0387896759
ISBN-13: 9780387896755

From the individual rage-driven violence of domestic abuse to the destructive causes and lasting consequences of large scale ethnic and political conflict, anger and its effects are ubiquitous in human life, and are the focus of intense study across many scientific disciplines: fields as varied as affective neuroscience, health science, psychology, psychophysiology, and sociology have all contributed to recent advances in the understanding of anger. The editors of the International Handbook of Anger bring these major contributions together for a unique portrayal of the many aspects of anger, evolutionary and biological bases, behavioral processes and effects, physiological concomitants, clinical aspects, and role in the larger social picture, with coverage that is both wide-ranging and integrative. State-of-the-art findings by highly regarded experts are organized for maximum utility, with extensive cross-referencing between chapters and editors' introductory commentary linking the book's sections. A sampling of the coverage in the Handbook: Historical views and roles of anger in Western and nonwestern cultures. Current genetic, neurological, neurochemical, and psychophysiological perspectives. Cross-cultural expressions: facial, vocal, and linguistic. Affective, motivational, and cognitive processes in anger. Gender differences in anger triggers, experience, and behavior. Anger in development and across the lifespan: Infancy, childhood and adulthood. Assessing anger, hostility, and anger control. Clinical aspects: psychopathology, anger and chronic pain, "Type A" behavior and cardiovascular health. Anger in family, small-group, and large-group conflict. The International Handbook of Anger presents a wealth of deep and detailed knowledge relevant to clinical and health psychology, social work, family studies, and anger management, among other fields. Its depth and breadth of coverage will make it a definitive volume informing research and practice in the years ahead.

Highlights of the 2011 Biennial Meeting of the Society for Research in Child Development, Montreal, CANADA, March 31-April 2, 2011

The 2011 Biennial Meeting of the Society for Research in Child Development (SRCD) was held from March 31-April 2 in Montreal. Below, I have included listings of the paper symposia linked to the keywords “aggression” and “bullying.” For space considerations, I did not include the listings of the numerous posters on these topics, but you can access those from the SRCD website that includes the 2011 Online Program (<http://www.srcd.org/meeting/schedule/2011/>). If you wish to obtain more information about these papers, you can find the email addresses of the authors of those papers using the SRCD website’s search engine: <http://www.srcd.org/meeting/schedule/2011/search.cfm>. I hope you find these listings helpful!

Biological Perspectives

Why Does Low Cortisol Predict Aggression in Children and Youth?

1. Genetic and Environmental Etiology of the Link Between Infancy Basal Cortisol and Future Externalizing Behavior
Amelie Petitclerc, Isabelle Ouellet-Morin, Sylvana Cote, Ginette Dionne, Michel Boivin, Richard E. Tremblay
2. Externalizing Behaviors and Cortisol Levels in Preschool Children: Preliminary Support for the Sensation-Seeking Hypothesis
Bridget E. Hatfield, Nicole E. Brown, Linda Hestenes, Crystal Sexton
3. Neuroendocrine Functioning in Incarcerated Youth: A Mechanism for the Development of Psychopathy
Andrew Gostisha, Elizabeth A. Shirtcliff, Michael J. Vitacco, Alexander Graf, Chelsea Brieman, Jenna Merz

Cultural Perspectives

Understanding Childhood and Adolescent Aggression in Cultural-Ethnic Context

1. Relational and Physical Aggression in Nine Countries
Jennifer E. Lansford, Ann T. Skinner
2. Justification of Interpersonal Aggression in Young and Adolescents of Both Sexes in Different Social-Cultural Contexts
J. Martin Ramirez
3. Cultural Values Related to Relational Aggression and its Normative Beliefs Among American and Chinese Adolescents
Yan Li, Michelle F. Wright, Junqi Shi
4. Perpetrator-Victim Dyads in Social and Physical Aggression: Ethnicity Composition and Victim Adjustment
Hongling Xie

Forms of Aggression

The Utility of Interview and Child-Reports of Relational Aggression in Early and Middle Childhood

1. Child-Report of Relational and Physical Aggression Predicting Peer Rejection in Early Childhood
Stephanie Godleski, Jamie M. Ostrov
2. Association Between Child-Reported Relational Aggression & Depression & Suicidal Ideation in a Child Psychiatric Inpatient Sample
Paula J. Fite, Laura Stoppelbein, Leilani Greening
3. Measuring Relational Aggression in Children: Comparing Interview and Questionnaire Formats
Stephanie L. S. Bass, Jennifer L. Tackett

Electronic Aggression and Victimization Across Development: Methodological Advances and Associations With Offline Aggression

1. Correlates of Electronic Aggression in Elementary School Students
Jean E. Burr
2. Examining the Relationship Between Traditional and Electronic Aggressors and Victims: Does Parental Monitoring Matter?
Juan F. Casas, Alicia A. Bower, Heather R. Giles-Woerner, Mandi Alexander, Joseph C. Lavoie
3. Relational Aggression and Cyberbullying: Concurrent and Longitudinal Associations
Laura A. Stockdale, David A. Nelson, Sarah M. Coyne, Craig H. Hart
4. Joint Aggression Trajectories and Adolescents' Use of Text Messaging
Marion K. Underwood, Lisa H. Rosen, Kurt J. Beron

Considering the Forms and Functions of Aggression: Development and Associated Adjustment in Early Childhood and Adolescence

1. Longitudinal Investigation of Forms and Functions of Aggression as Predictors of Rule-Breaking Behavior
Paula J. Fite, Jamie Rathert, Michael Vitulano, Porche' Wynn, Alden E. Gaertner, Amber R. Wimsatt, Stevie N. Grassetti, Teri Preddy
2. Forms and Functions of Aggression and Adjustment in Early Childhood: A Short-Term Longitudinal Study
Jamie M. Ostrov, Dianna Murray-Close, Stephanie Godleski, Emily J. Hart
3. The Forms and Functions of Aggression and Adjustment in Early Adolescence: A Short-Term Longitudinal Analysis
Tiina Ojanen, Sarah M. Kiefer
4. Do Victims Distinguish Between Reactive and Proactive Functions of Aggression?
Russell B. Toomey, Deborah M. Casper, Noel A. Card

Fighting Amongst Ourselves: Examining How Adolescents Use Technology to Victimize Their Peers

1. From the Tween Years to College: Age Differences in the Experience of and Emotional Response to Cyber-Bullying
Alisha Renee Walker Marciano, Kelly Schimmel Flanagan
2. The Ugly Face of Facebook: Adaptation of the Cyber Victimization Scale Among Younger Adolescents
Ryan R. Landoll, Annette M. La Greca, Whitney M. Herge
3. Off the Radar and Ubiquitous: Text Messaging and Its Relationship to 'Drama' and Cyberbullying in High School
Kathleen P. Allen

Forms of Victimization and Aggression: Next Steps Toward Synthesis and Advanced Understanding of Associations and Outcomes

1. Overt and Relational Victimization: A Meta-Analytic Review of Their Overlap and Associations With Maladjustment
Deborah M. Casper, Noel A. Card
2. Examining Growth in Victimization Types and Internalizing Problems in Early Adolescence: Potential Gender and Ethnic Differences
Eric S. Buhs, Meredith A. McGinley, Emily R. Griese
3. Growth Curve Models of Relational and Physical Peer Victimization and Psychosocial Adjustment in Taiwanese School-Aged Children
Wan-Ling Tseng, Yoshito Kawabata, Nicki R. Crick, Susan Shur-Fen Gau
4. Associations Between Adolescents' Relational Aggression and Weight-Related Attitudes and Behaviors
Diana Rancourt, Mitchell J. Prinstein

Gender Issues

Early Emerging Sex Differences in Disruptive Behavior: Differentiating Patterns by Age, Violence Exposure, and Aggression Type

1. The Development of Gender Differences in Physically Aggressive Behaviors During Toddlerhood and the Preschool Period
Raymond H. Baillargeon
2. The Emergence of Sex Differences in Overt and Relational Aggression in Children Under Three
Sarah A. O. Gray, Alice S. Carter
3. Early-Emerging Sex Differences in Conduct and Anxiety Symptoms: Family Violence Effects
Margaret Briggs-Gowan

For Better or Worse: Intimate Relationships as Sources of Risk for Girls' Delinquency

1. Deconstructing PTSD: Interpersonal Trauma, PTSD Symptom Clusters, and Mental Health Among Delinquent Girls
Patricia K. Kerig, Karin L. Vanderzee, Rose Marie Ward, Stephen P. Becker
2. Negative Relationship Experiences as Predictors of Dating Violence Among Teenage Girls
Alison E. Hipwell, Stephanie D. Stepp, Magda Stouthamer-Loeber, Rolf Loeber
3. Romantic Partners' Influence on Girls' Offending Trajectories Over the Transition to Adulthood
Barbara A. Oudekerk, Nicholas Dickon Reppucci
4. Intervention Prior to Middle School to Prevent Risky Sexual Behavior Among Girls in Foster Care: Results From 36-Month Follow-up
Hyoun K. Kim, Katherine C. Pears, Leslie D. Leve, Patricia Chamberlain, Dana Smith

Bullying Research and Interventions

Federal Partners in Bullying Prevention Summit: An Empirical Follow-Up

1. Unequal Status in Bully-Victim Relationships: Social Network and Sociometric Dynamics
Deborah A. Temkin, Philip C. Rodkin, Scott D. Gest, Kristen Granger
2. New Large-Scale Data and a New Look at Cyberbullying
Dan Olweus, Sue Limber
3. Student, Staff, and Parent Perspectives on Bullying and School Climate: Implications for School-Wide Bullying Prevention
Catherine P. Bradshaw, Tracy Evian Waasdorp
4. Has the Ship Really Sailed? Rethinking Universal and Targeted School Bullying Prevention Efforts
Dorothy Lynn Espelage

Insights Into the Effects of KiVa Anti-Bullying Program: Evaluation Study and Nationwide Diffusion

1. The Effects of the KiVa Program on Bullying and Victimization in a Randomized Controlled Trial and During Nationwide Diffusion
Antti Kärnä, Marinus Voeten, Todd D. Little, Erkki Alanen, Elisa Poskiparta, Christina Salmivalli
2. KiVa Anti-Bullying Program: Implications for School Adjustment
René Veenstra, Claire F. Garandau, Christina Salmivalli
3. Same- and Other-Sex Victimization: Risk and Protective Factors and Effects of the KiVa Intervention
Miia Sainio, Gijs Huitsing, René Veenstra, Christina Salmivalli
4. Student and School Level Characteristics That Accelerate Positive Impacts of the KiVa Anti-Bullying Program
Anne Williford, Aaron Boulton, Todd D. Little, Antti Kärnä, Christina Salmivalli

Bridging Science and Practice: From Peeking Behind the Fence to National Bullying Prevention Initiatives

Chair: Aletha Huston

Speaker: Debra J. Pepler

Taking a Closer Look at Bullying: A Multi-Method Developmental Approach to Studying Social Dynamics

1. Catching Bullying Dynamics in Classrooms: An Observational Approach
Roberta Renati, Maria Assunta Zanetti
2. Capturing Life as it is Lived: Diary Data Refine Questionnaire Results in the Effect Evaluation of an Empowerment Program
Marieke Boelhouwer, Paul Van geert
3. Social Network Analysis of Different Informant Approaches to Bullying
Gijs Huitsing, René Veenstra
4. Being Bullied by Same- Versus Other-Sex Peers: Does It Matter for the Victims?
Miia Sainio, Christina Salmivalli

Beyond Surveys: Understanding Peer Victimization Through Children's Observed Behavior, Visual Attention, and Biological Reactivity

1. Testosterone/Cortisol Ratio and Peer Victimization Among Toddlers: A Multi-Informant, Multi-Method Approach
Tracy Vaillancourt, Cameron Muir, Heather Brittain, Jamie M. Ostrov, Jean Clinton, Louis A. Schmidt
2. Naturalistic Observations of Social Behavior Predict Subsequent Victimization
Lauren E. Bohn, Karen Rudolph, Elenda T. Hessel, Hannah C. Bianco, Molly Bartlett

3. Pervasively Aggressive Victims: How Do They Differ From and Relate to Others on the Playground?
Karin S. Frey, Patricia H. Hawley
4. Allocation of Visual Attention to Scenes of Peer Harassment: Links to Aggression, Victimization, and Related Psychopathology
Wendy Troop-Gordon, Robert D. Gordon, Elizabeth Ewing-Lee, Kari Jeanne Visconti

Bearing Witness to Bullying: How Can Bystanders Be Empowered to Protect Their Victimized Classmates?

1. Outcome Expectations and Values Associated With Different Behaviors in Bullying Situations
Virpi Pöyhönen, Jaana Juvonen, Christina Salmivalli
2. Peer Responses to School Bullying: The Role of Emotions and Friendships in Early Adolescent Bystanders' Social Problem-Solving
Natalie Rocke Henderson, Shelley C. Hymel
3. Individual Correlates and Class Norms Related to Defending and Passive Bystanding Behavior in Bullying: A Multilevel Analysis
Tiziana Pozzoli, Gianluca Gini, Alessio Vieno, Simona C. S. Caravita
4. Changing Bystanders to Defenders: A Norms-Based Approach
Marlene J. Sandstrom, Maria Bartini

Maltreatment

Maltreated Children in Adolescence: Lessons From LONGSCAN

1. Longitudinal Studies of Child Abuse and Neglect (LONGSCAN): An Overview
Tisha Wiley
2. Maltreatment Allegations Among High Risk Single-Mother Families: A Longitudinal Look at Family Composition and Change
Rae R. Newton, Alan J. Litrownik
3. Initiation of Sexual Intercourse Among Maltreated Adolescents: The Impact of Parental Monitoring
Sarah E. Oberlander, Yan Wang, Richard Thompson, Terri L. Lewis, Laura Proctor, Patricia Isbell, Diana J. English, Howard Dubowitz, Alan J. Litrownik, Maureen Black [
4. Effects of Maltreatment and Family Stability on Aggression Trajectories From Ages 4 to 12
Tisha Wiley, Richard Thompson
5. Social Support Correlates of Internalizing and Externalizing Trajectories Among At-Risk Adolescents
Stephanie D. Block, Sharon L. Christ, Desmond Runyan, Alan J. Litrownik, Tisha Wiley, Howard Dubowitz, Maureen Black, Laura Proctor, Patricia Isbell, Diana J. English
6. Suicidal Ideation in Adolescence: Examining the Role of Adverse Experiences
Richard Thompson, Laura Proctor, Diana J. English, Mark D. Everson, Subasri Narasimhan, Howard Dubowitz

Developmental Issues

Desistance, Persistence and Onset of Antisocial Behaviour in Early Adulthood: Effects of Distal Risk and Proximal Experiences

1. Pathways From School Bullying to Adult Aggression
Jacqueline B. Homel
2. Assessing Proximal and Distal Effects of Binge Drinking on Violent Behaviour Amongst Young People in England and Wales
Carly Lightowers
3. Does Perceived Social Support Moderate Relations Between Bullying Victimization in Adolescence and Delinquency in Young Adulthood?
Tara Renae McGee, Jake Najman

Aggression and Antisocial Behavior From Preadolescence to Adolescence: A Developmental Contextual Approach

1. The Development of Aggression and Links to Depression
Debra J. Pepler, Effie Avgoustis, Depeng Jiang, Wendy Craig, Jennifer Connolly
2. Codevelopment of Delinquent and Depressive Symptoms Across Adolescence in Relation to Time-Invariant and Time-Varying Factors
Ersilia Menesini, Annalaura Nocentini
3. Social and Physical Aggression During the Transition to Middle School: The Role of Perceived Popularity
Hongling Xie, Bing Shi

The Role of Bystanders in Bullying: Basic Research to Intervention

1. Children's Physiological and Emotional Reactions to Witnessing Bullying
Lydia R. Barhight, Julie A. Hubbard
2. Bullies, Victims and Bystanders: Who Helps, Who Hurts, and Who Walks Away?
Jessica J. Trach, Shelley C. Hymel, Terry Waterhouse, Sandra Gregory
3. Mobilizing Bystanders to Stand UP! To Bullying: Moving Science Into Practice
Debra J. Pepler, M. Catherine Cappadocia, Joanne G. Cummings, Wendy Craig

THE INTERNATIONAL SOCIETY FOR RESEARCH ON AGGRESSION

Founded in 1972

ISRA: an Interdisciplinary Society

ISRA, the International Society for Research on Aggression, founded in 1972, is an international interdisciplinary, organization dedicated to the study and dissemination of information on the causes and consequences of aggressive behavior and violence in all of its forms and contexts.

The Social Burden of Violence

The human capacity for aggressiveness and violence inflicts a considerable burden on society. Obviously, it can lead to death and immediate physical injury, but it also creates long-term physical and emotional disabilities. In addition, violence has a profound effect on those who witness it, such as the families and communities of the victims. Moreover, it impairs the ability of communities to address important public health issues, such as infectious diseases, malnutrition, urban decay, and environmental hazards. Violence and aggression often prevents the delivery of critical public services, such as emergency management and education. Such effects on society tend to exacerbate the very adverse social conditions that promote aggression, facilitating a vicious circle, with violence as a crucial factor.

home page: www.israsociety.com

ISRA's Core Mission

Effectively addressing violence and aggression, whether it be child abuse, domestic violence, homicide, terrorism, sexual violence, or civil wars, requires a sustained focus by international scientists. *ISRA's principal mission* since 1972 is to show that aggression and violence, as well as alternative ways to resolve conflicts, can be successfully studied using scientific methods.

Members, Meetings and Media

- *ISRA* members gather for *World Meetings* every other year on alternating continents.
- All members receive *Aggressive Behavior* the official journal of ISRA at a discount.
- Members receive the *ISRA E-Bulletin*.

From Understanding to Solutions

Finding solutions to the pervasive consequences of aggression, requires a multidisciplinary approach. To understand the complex causes, our research addresses brain and other physical processes that underlie the human capacity for violence and the psychological processes that facilitate violent actions. Strategies providing alternatives to violence are studied together with the social factors that serve to promote or prevent violent behavior. Importantly, students of aggression studies are increasingly moving beyond the simple awareness of new results in other disciplines, to develop important research approaches that span multiple disciplines. As a result, novel areas of synergy and convergence between different disciplines and methodologies emerge. *ISRA meetings* and media provide the forum and the multidisciplinary audience.

A Multidisciplinary Society

ISRA is home to virtually all scientific disciplines interested in aggression and violence, such as psychology, neuroscience, anthropology, animal behavior, endocrinology, primatology, psychiatry, genetics, pharmacology, sociology, and criminology. Joining **ISRA** will help you to reach the right audience for your own research. Its meetings provide an optimal forum to learn about novel concepts and advances in other fields. Members enjoy reduced registration fees at **ISRA meetings**.

Awards

- Each World Meeting the **John Paul Scott Award** is presented to a scientist with a distinguished lifetime contribution to aggression research.
- **Lagerspetz Awards** are granted to young scientists for excellence in presentation of original research to a multidisciplinary audience.
- **The Young Investigator Program** intends to encourage and help people who are beginning their careers in aggression research.

The ISRA Logo

The ISRA logo reflects our intention to advance the understanding of a deeply rooted behavior. The humanoid figure in the logo was modified from a petroglyph called "the warrior" on the Minnesota-Ontario border¹⁾. The figure seems to express the ambivalent human attitude towards aggression. The figure faces us, a spear in its left hand, reflecting potential to kill. The tip of the spear points downwards, so the weapon is not about to be thrown. The right hand is up and open, a stop-signal in many cultures, and often a signal of peaceful intent. The heart-shaped body expresses force and human's emotional nature.

M Furtman, Magic on the rocks (2000) ISBN: 0-916691-02-0

Home page: www.israsociety.com

Membership

ISRA has four kinds of members:

- **Fellows** are scientists working in any biological, psychological or social science on problems of aggression.
- **Associates** are scientists or professionals supportive of the Society's goals but who are not actively engaged in aggression research.
- **Student members** are graduate students nominated by a Fellow of the Society.
- **Life Fellows** are chosen on a significant lifetime record in aggression research.
